

Raw material

The raw materials of ManX based on the British Isle, Isle of man with the Isle of man must be used when manufacturing the lime pebbles, pebbles from the quality of a local named "Niarbyl" after a long river, no pollution of river erosion, making these pebbles become very smooth and white, every day by many raw materials procurement division from Manntree will select every pebble after processing, after calcination, filtration, precipitation, standing 48 steps, can be applied directly on the Isle of man in lime.

Today, was selected as a raw material for the Isle of man lime Isle of pebbles, the British Isle of man to Chinese nature of raw materials.
